What we do...

For those unfamiliar with our company, we are a process engineering business providing design support and specialist vessel internals to the oil, gas and petrochemical industries.

News from KIRK Process Solutions...

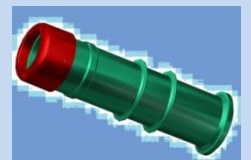

SEPARATOR SOFTWARE LAUNCHING SOON

A comprehensive range of competitively priced design spreadsheets for horizontal and vertical gas/liquid separator sizing and simulation will be available shortly. To register your interest, please e-mail us.

HIGHSPEED AXIAL SWIRL TUBES

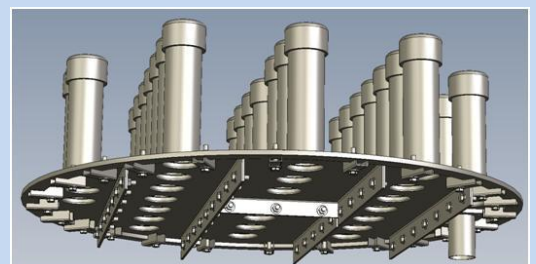

KIRK Process Solutions has taken over the manufacture of GESIP's axial cyclone range to further enhance the product's competitiveness.

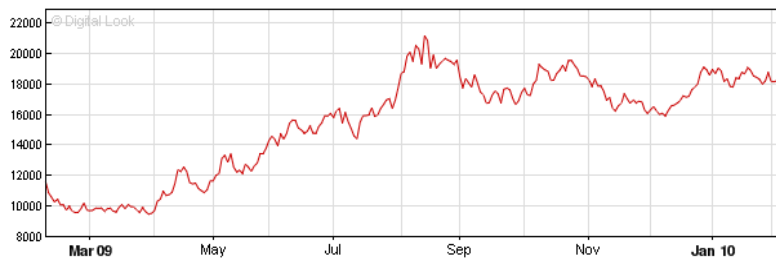

These are now available exclusively from either HAT International, or direct from ourselves. For our latest literature on Compact Gas Scrubbers, please contact us.

3D CAD DESIGN

A very competitive solution is now offered for full 3D drafting design of vessel internals layouts with walk-through and material take-off capability.

SEPARATOR DESIGNS FOR EGYPT

KIRK Process Solutions has been assisting a customer in Italy with the recommendation of new internals to retrofit 2 existing separators to improve the oil/water separation performance using our specialist modelling software.

400 HIGHSPEED SWIRLTUBES IN SS316

Ordered by HAT International Limited on behalf of a UK Process House, these axial cyclones will be used in 2 large fuel gas conditioning drums for a new power plant in Kuwait under construction by Hyundai.

HIGHSPEED DELIVERY FOR OFFSHORE INDIA

In January we shipped a consignment of GFP (Glass Filled Polypropylene) axial cyclones to a customer in Abu Dhabi for use in a glycol outlet gas scrubber for the ICP-R Platform (ONGC)

TRAINING SERVICES

In conjunction with our partners HAT International we offer a comprehensive range of technical training on all aspects of mass transfer and separation technology for the oil, gas and petrochemicals industries.

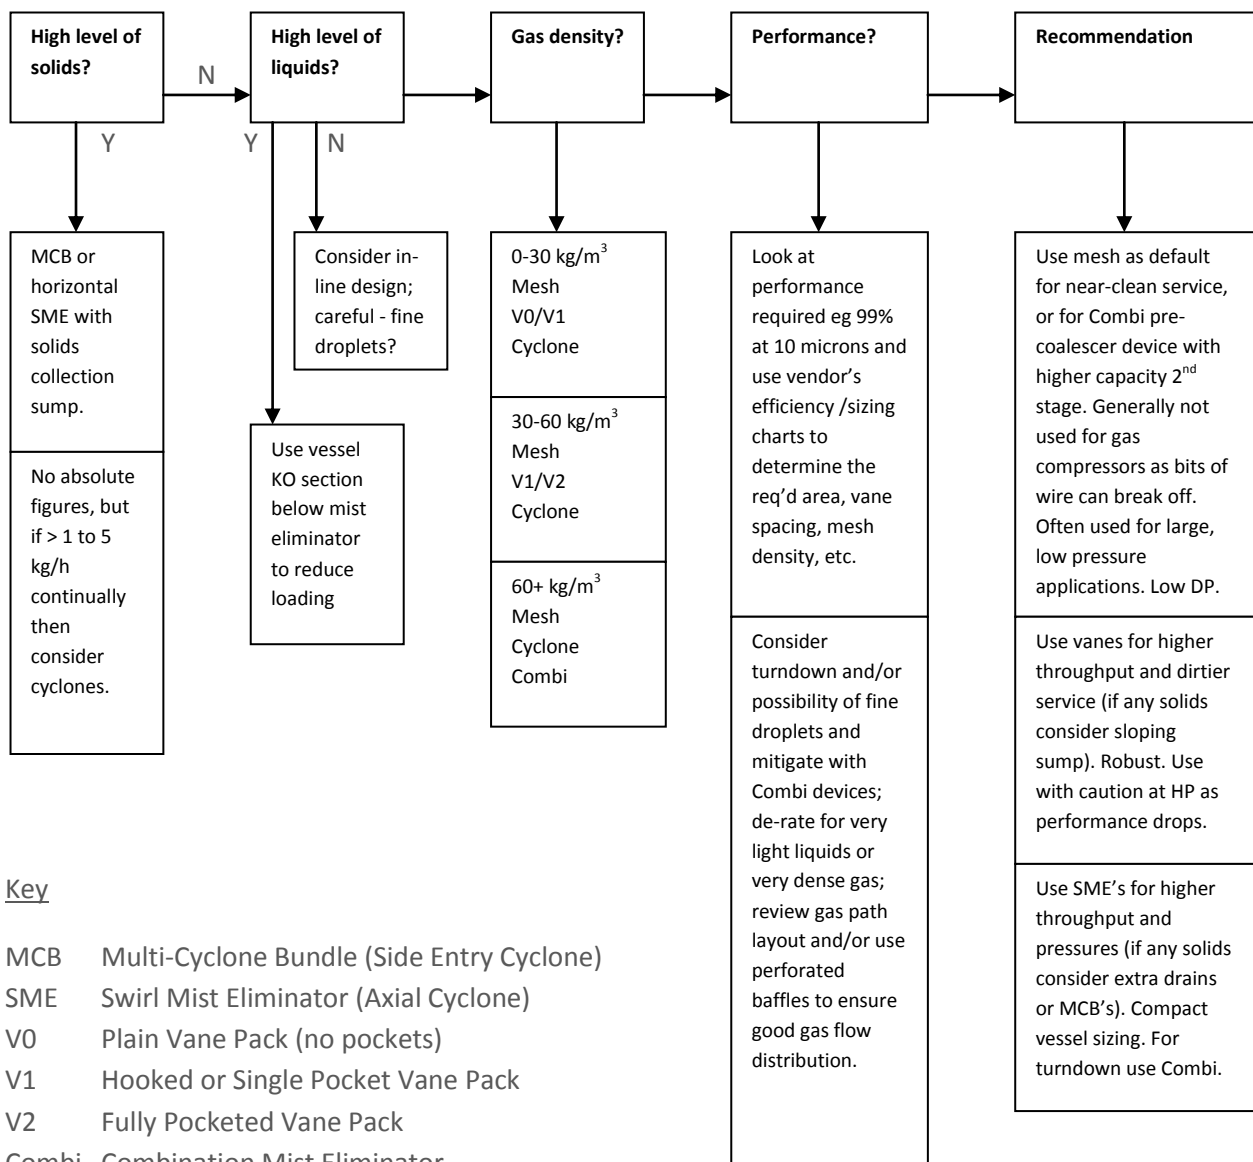

Covering areas such as how to select and size the most appropriate trays and packings, gas and liquid distributors, mist eliminators and coalescers, courses can be delivered at our offices or your own premises. Contact us or info@hatltd.com for more information.

DESIGN GUIDE

OPTIMISING THE SELECTION OF MIST ELIMINATOR

The following chart is designed to assist your choice of the best performing mist eliminator device or combination of devices for any particular application. Note that different suppliers will quote different performance figures and throughput capabilities so use this as a guide only.

Key

- MCB Multi-Cyclone Bundle (Side Entry Cyclone)
- SME Swirl Mist Eliminator (Axial Cyclone)
- V0 Plain Vane Pack (no pockets)
- V1 Hooked or Single Pocket Vane Pack
- V2 Fully Pocketed Vane Pack
- Combi Combination Mist Eliminator
